EDUCATION

Bachelor of Science: Mechanical Engineering (2021), The University of Toledo | GPA: 3.4

Certificate in Financial Planning (CFP Coursework Enrolled), Boston University (Online)

PROFESSIONAL DEVELOPMENT

The Externship – Amplified Planning

Virtual | Summer 2026

- Over the course of 8 weeks, I observed real client meetings and developed financial planning deliverables across cash flow, investments, insurance, taxes, college/student planning, retirement and estate planning.
- I gained hands-on experience with industry standard technology, including eMoney, Asset-Map, Redtail, EncorEstate Plans, Holistiplan, and Nitrogen. I also learned from 30+ financial planning professionals featured and earned 500 hours toward CFP Board Standard Pathway experience requirements.

PROFESSIONAL EXPERIENCE

Ohio Army National Guard

Operations Project Officer (O2)

10/2024 - Present

Security Clearance: Secret (2019, US DOD)

Dublin, OH

- Cultivated high-level trust among senior executive leadership by providing strategic problem-solving and managed the end-end delivery of high-visibility state events, ensuring seamless cross-functional execution.
- Transformed unit reporting by migrating excel based tracking to an integrated SharePoint environment which optimized information flow between senior leadership and operational units, reducing communication errors and improving the execution of high-level directives.

Turner Construction

Assistant Engineer

04/2024 – Present

Columbus, OH

- Directed end-to-end asset procurement and delivery schedules for multi-million dollar client-furnished equipment, ensuring alignment with technical specifications and project timelines.
- Streamlined the submittal review process, reduced lead times for material approval through meticulous attention to detail and efficient stakeholder communication.
- Championed a culture of operational compliance by auditing daily partner workflows and providing real-time feedback to ensure adherence to firm-wide safety and performance protocols.

Axium Packaging

Corporate Engineer

10/2023 – 04/2024

New Albany, OH

- Accelerated manufacturing production timelines by identifying and resolving critical technical defects during on-site qualification trials, ensuring on-time delivery of products and maintained 100% client satisfaction.
- Enhanced organization knowledge transfer by creating training materials for incoming engineers and conducted plant tours to showcase service capabilities to customers.

Ohio Army National Guard Deployment,

Entry Control Point Platoon Leader (O1)

09/2022 – 08/2023

Al Asad Airbase, Iraq

- Established a culture of excellence for a 33-member team by conducting bi-monthly evaluation tests to mitigate operational risk and ensure strict adherence within a high-stakes environment.
- Responsible for \$9.5M worth of mission-critical equipment, implemented strict risk mitigation protocols to ensure asset security and zero-loss of equipment.

- Acted as the primary liaison between the Army Engineers and security to coordinate infrastructure upgrades that would improve working conditions and enhance physical security.

Allied Machine and Engineering

Field Sales Engineer in Training

Dover, Ohio

06/2021 – 08/2022

- Accelerated technical and product knowledge through a rotation between Application Engineering and Sales. Developed and delivered high-impact product training for regional leadership and client-facing teams, increasing the field's proficiency in communicating complex product value to clients.
